## SOFTWARE DEVELOPER

**Technical Expertise:** Experienced in all aspects of software development from inception through release. Primarily concentrating on developing applications for use in the enterprise environment and on the web.

**Project Management:** Experience in project management duties as a Director of Software Products and Services and in supervisory and project management roles. Ability to track and manage multiple projects simultaneously.

**Support and Training:** Experience in software testing (both regression testing and user acceptance testing). Have taken part in developing and growing testing teams/departments, software startup efforts, etc.

---

## TECHNICAL EXPERTISE

### Operating Systems

Linux and Microsoft Windows

### Programming Languages/Technologies

C/C++ (9 years)

Visual Basic (10 years)

VB.Net, C#(5 years)

ASP (8 years), ASP.NET (5 years)

HTML, CSS, JavaScript (9 years)

COM/COM+ (8 years)

PHP (4 years)

AJAX (2 year)

Flex/ActionScript (<1 year)

### Database Technologies

Microsoft SQL Server (9 years), Oracle (1 year), MySQL (2 years)

---

## PROFESSIONAL EXPERIENCE

GoTrybe, LLC

*Lead Developer, System Administrator, DBA – 2007-present*

**Primary Technologies used: Linux, PHP, MySQL (Bash and Python Scripting as well)**

Working for a start-up company concentrating on kids' fitness and health. Primary developer of server side code and AJAX portions of forward-facing pages. Responsible for all aspects of ensuring standards of development, testing and deployment are created and adhered to. Responsible for the architecture of the site as a whole (not design aspects). Also responsible for the creation and maintenance of the databases and stored procedures.

Responsibilities extended to the system administrator role. Responsible for creating needed cron jobs, backups, website setup, SVN setup and access, database setup and access, etc.

**Key Duties:**

- Analyze requirements and provide estimates for new functionality or enhancements to existing functionality.
- Develop code as required to provide desired functionality, improve performance, tighten security or provide strategic advancements over our competitors.
- Provide technical documentation on development processes and requirements when these were not available.
- Solve problems as they are discovered in the code, data or processes.
- Proactively search, evaluate and recommend solutions to existing challenges and potential future needs.
- Be responsible for GoTrybe's code base, databases and scripts to allow daily operations to continue uninterrupted.

**Tele-Optics, Kingsport, TN**

*Contract Developer -- 2006-2007*

**Primary Technologies used: VB, VB.Net, C#, ASP and ASP.Net**

Working on location at Eastman Chemical in Kingsport, TN. Job duties included supporting and enhancing a wide variety of software applications. Most were web-delivered applications with internal and external facing portions. Applications were distributed in a multi-silo environment that was load-balanced. Many software objects were remote objects (old DCOM and new DotNet remoting).

**Key Duties:**

- Respond to support issues as needs arose. Determine cause of issue, most appropriate fix and implement the fix.
- Estimate development and testing time on new enhancements to existing systems or new software needs.
- Provide technical documentation on development processes and requirements when these were not available.

- Leverage existing experience to produce better code faster.

### **TEKSystems, Knoxville, TN**

*Contract Developer -- 2005-2006*

#### **Primary Technologies used: VB.Net, C# and ASP.NET**

Working on location at King Pharmaceuticals in Bristol, TN. Initially contracted to assist in meeting a tight deadline for a new software release that was beginning to fall behind. Delivered the release at only 14 days over estimate and with 25% more functionality that previously planned. Included full documentation for a user manual, etc.

#### **Key Duties**

- Create a web application for sales management use, interfacing with data in an Oracle data store.
- Rapidly complete project to meet original deadline.
- Have worked on other projects as needed, and always exceeding expectations.

### **Intellithought, inc., Kingsport, TN**

*Technical Lead/Developer -- 1998-2005*

#### **Primary Technologies used: VB, VB.Net, C# and ASP.NET**

Primary duties varied, but always included development efforts. Director of Software Products and Services was highest managerial position attained, but still carried development responsibilities. Primary job duties were usually on-site contract developer or at the show working on client projects.

### **SPS Payment Systems, Gray, TN**

*Developer -- 1996-1998*

*Software Tester -- 1995-1996*

*Help Desk Representative -- 1990-1995*

---

## **EDUCATION AND TRAINING**

Various courses in Computer Science and Core Curriculum working towards Bachelor of Science Degree (Cumulative GPA 3.6, 4.0 in Major)

Microsoft Courses in SQL Server, .NET and Visual Basic
